PROJECTS

Power BI Financial Dashboard – Accounts Payable Analytics (*Power BI, Power Query, DAX, Excel*) 2026

- Designed and developed an **interactive Power BI dashboard** to analyze and visualize Accounts Payable operations data including invoice tracking, vendor payments, and aging analysis.
- Performed **data transformation and modeling** using **Power Query** to clean, reshape, and load structured financial datasets.
- Built **DAX measures** to calculate KPIs including Days Payable Outstanding (DPO), overdue invoice ratios, and vendor-wise payment trends.
- Created **dynamic visuals (bar charts, KPI cards, slicers, trend lines)** to enable drill-down analysis by vendor, date, and invoice status.
- Applied domain knowledge from RR Donnelley AP operations to ensure business-relevant reporting aligned with real finance workflows.

E-Commerce Sales Analysis (*Python, Pandas, Matplotlib, Seaborn*) [\[Colab\]](#) 2025

- Performed end-to-end **Exploratory Data Analysis (EDA)** on an e-commerce sales dataset to surface actionable business insights.
- Conducted **data cleaning and preprocessing**: handled missing values, removed duplicate records, and standardized data types for analysis readiness.
- Analyzed **regional and category-wise sales performance** using groupby aggregations to identify high-revenue segments and underperforming markets.
- Developed **data visualizations (bar charts, pie charts, trend plots)** using Matplotlib and Seaborn to communicate findings to non-technical stakeholders.
- Derived strategic recommendations to support **inventory optimization and sales strategy decisions** based on demand trend analysis.
